

Congratulations “Creature Feature Team” with having placed for our California DI State Tournament. For those that are coming to States, we are very much looking forward to seeing your solutions performed at Riverside on March the 28th.

We will have 3 different performance areas to handle all the fantastic Creature Feature teams in the state, so please locate your venue on the site map. Be aware that the performance area will, in all likelihood, be different from what you experienced at your Regional Tournament. They all will conform to the minimal requirements outlined in the Challenge and Rules of the Road. For example the floor may be short napped carpet instead of the vinyl tile floor you experienced before.

Please note that we will require teams to place all their props entirely in the Launch Area, with help of TM’s and parents if needed. However, once the 8 minute performance time begins they must completely move out of the Launch area and into the adjacent performance area, without assistance of non-team members, so that the next team can queue up while the appraisers talk with the team at the end of their performance. The Launch Area will be indicated with taped lines and the Appraisers will show you where it is.

We wish you much success and creative DI fun while making your final preparations,

California Challenge Masters for Creature Feature
