

IC Team Plan

START SMART!!

- S** S = **STOP!** Don't touch anything until you are told to!
& Stop working when time is called!
SCORE what will get you the most points!
- M** M = **Materials**. Make sure you got all of them. Know how to use them. What is the best connector, what supports ...
- A** A = **ALL!** All of your team needs to participate and be involved. You can have a timer, a cheerleader, a builder...
- R** R = **Rules!** What do the rules say you **MUST** do?
What do the rules **NOT** say? Do it! Unless you are going to destroy something – ask first.
- T** T = **Think!! And Teamwork.** Take time at the beginning to think. Get an idea from everyone – this maxes out your teamwork points and you get more than one idea. Know who your best builder is – know who shouldn't build
Divide the work. And don't forget **Time**. Is this a one part or two part challenge?
How much time do you have for the parts?
